EXAMINER

LYONS, MICHAEL A

ART UNIT

PAPER NUMBER

2877

MAIL DATE

DELIVERY MODE

04/03/2009

PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/591,502	Applicant(s) DRABAREK, PAWEL	
	Examiner MICHAEL A. LYONS	Art Unit 2877	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 March 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 8-13 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 8-13 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 01 September 2006 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because Figure 1 contains non-English element markings. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Objections

Claim 8 is objected to because of the following informalities: line 15 of the claim currently reads “the switching device allowing the different measuring probes”, where it should read “the switching device allows the different measuring probes” to be more grammatically correct. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 8, lines 6-7 set forth “a measuring probe system connected to the transmitting element and for supplying the radiation via a common optical path”. This is unclear

Art Unit: 2877

to the examiner; how can the measuring probe system both act as a measuring probe and provide radiation to itself via a common optical path?

Claims 9-13 are also rejected for the reasons set forth above for containing all the limitations of at least claim 8.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Balachandran et al (US 6,901,176).

Regarding claim 8, Balachandran (Fig. 3) discloses an interferometric measuring system comprising a transmitting element including a modulation interferometer 22 and a radiation

Art Unit: 2877

source 38 for short-coherent radiation; a measuring probe system 40 connected to the transmitting element and for supplying the radiation via a common optical path (see optical fibers in Figure 3); a receiving element 28 for analyzing a measuring radiation returning from the measuring probe system; wherein the measuring probe system includes a plurality of measuring probes 12 coupled to the common optical path via respective optical paths 32; and a switching device 30 disposed at a coupling point between the common optical path and the respective optical paths to the measuring probes, wherein the switching device allows the different measuring probes to be individually brought into a bidirectionally transmitting connection with the transmitter and receiver for the radiation supplied by the modulation interferometer, on the one hand, and the measuring radiation, on the other hand (see, for instance, Col. 8, line 61 – Col. 9, line 26).

Balachandrian, however, fails to disclose the transmitting unit and the receiving unit integrated in the same unit.

However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to integrate the transmitting and receiving unit of Balachandrian into a single transmitting/receiving unit as per the instant claim, the motivation being that integrating parts has been held to be within the realm of one of ordinary skill in the art as a matter of obvious design choice, in addition to the benefits in the instant sense of making the device more compact. *In re Larson*, 340 F.2d 965, 968, 144 USPQ 347, 349 (CCPA 1965).

As for claim 9, Balachandrian discloses the use of a single mode fiber (see, for instance, Col. 9, line 32).

Art Unit: 2877

As for claims 10-12, Balachandrian discloses optical switch 30, which inherently features control elements that, either automatically or manually (claim 10 and 12), switch via electronic or other means (claim 11) between one fiber probe and another, by the well known definition of how an optical switch operates.

As for claim 13, each probe 12 forms an individual measurement channel of a probe unit 40.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Pat. 5,293,215 to Pfendler et al., US Pat. 6,519,041 to Berthold, US Pat. 6,678,055 to Du-Nour et al., and US Pat. 7,206,076 to Blalock.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL A. LYONS whose telephone number is (571)272-2420. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory J. Toatley can be reached on 571-272-2800 ext. 77. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
